

Vegetation Management

Landloch's experienced and accredited technical staff provide a range of vegetation management services, including:

- Spot spraying of weeds;
- Broad acre spraying of major weed infestations;
- Cutting and stump-treating saplings; and
- Use of chainsaws and brush cutters to reduce vegetation loads.

Landloch technical staff are accredited to transport, handle and apply herbicides, and to use equipment such as chainsaws. They have experience with the identification and eradication of a wide range of weed species, development of weed management strategies, and with the on-going monitoring of weeds on specific sites.

Equipment includes 4WD mounted spray unit with 2 retractable hand spray hoses, spray boom, and associated knapsacks and light equipment.

Landloch is a registered Ground Distribution Contractor.

All staff hold minesite safety accreditation (Coal Surface, Generic), and are conscious of the requirements for workplace safety.
